

# ASSIGNMENT-2

## *1. How to display images in title bar?*

- Most websites add an icon or image logo in the title bar. This icon logo is also called a favicon and can be useful for user engagement.
- A favicon, also known as a URL icon, a tab icon, a shortcut icon, a website icon, or a bookmark icon, is a file containing one or more small icons associated with a particular website or web page.

*2. What is the purpose of "alt" attribute of img tag?*

- *The required alt attribute specifies an alternate text for an image, if the image cannot be displayed.*

*3. Why do we use tbody, thead, tfoot tags?*

- *The <thead> tag is used to group header content in an HTML table. The <thead> element is used in conjunction with the <tbody> and <tfoot> elements to specify each part of a table (header, body, footer).*
